0114 Safety Guidance

Using the Poker Vibrator

- Wear protective equipment including gloves, goggles and safety boots.
- You may need to allow the unit to warm up for a few minutes in cold weather for maximum efficiency.
- If the vibrating head does not vibrate when the machine is started, tap the nose onto a hard surface. Do not tap or hit the outer housing of the head.
- Watch out for signs that vibration may be affecting your hands. If fingers start to tingle or feel numb, take a short break from using the machine. Exercise fingers to encourage blood circulation. Find out more about vibration. Ask the hire company for a copy of the HAE leaflet no. 2150 - Hand-arm vibration or visit www.hse.gov.uk/vibration
- To help prevent vibration affecting hands, operate the machine for shorter periods, or share the job with a workmate. Keep hands warm - wearing gloves may help do this.
- Take care not to bend the flexible drive through tight angles, for example over shuttering.
- Always move and withdraw the vibrating head steadily this will help avoid creating voids.
- Do not touch the vibrating part of the poker while it is in operation.
- Do not lay the vibrating poker on a hard surface while it is still vibrating. It will cause damage to the surface and the poker.
- Do not disengage the flexible drive coupling while the motor is running.
- 11. Take care not to accidentally pull the plug from the socket.
- Stop the unit and unplug it if leaving the machine unattended
- If the cable is found to be cut or damaged in any way, switch off and unplug at the socket before inspecting it. If the cable attached to the drive unit is damaged, stop using the machine. Contact the hire company. If an extension cable has been damaged, do not use it again.
- The poker vibrator must be cleaned as soon as work is finished before any concrete on it goes hard.
- If the flexible drive has been disengaged, take care to keep the open end of it clean do not leave it lying in dirt.
- 16. If the equipment does not work properly do not attempt to repair it. Contact the hire company.
- You may want to read this leaflet again. Please keep safely it until you finish work.
