

## Using the Impact Wrench

- Wear your protective equipment including ear defenders and goggles.
- Check that the socket or other attachment is fitted correctly.
- Ensure there are no apparent air leaks.
- At intervals, while working, stop and check for air leaks and other possible faults.
- Always grip the impact wrench correctly with two hands while using. If your wrench has a side handle, use it.
- Be prepared for the reactive force, trying to twist the wrench, when you start to undo a bolt.
- Do not try to change the rotation when the wrench is running.
- Stop the wrench and shut off the air supply before making any adjustments.
- Watch out for signs that vibration may be affecting your hands. If your fingers start to tingle or feel numb, take a short break from using the machine. Exercise your fingers to encourage blood circulation.
- To help prevent vibration affecting your hands, operate the machine for shorter periods. Keep your hands warm – wearing gloves may help do this.
- Stop work if someone approaches you.
- You must shut down and release the air pressure before you disconnect any part of your equipment.
- Shut down and release the air pressure before you leave your equipment unattended.
- If your equipment develops a leak or does not work properly, do not attempt to repair it. Contact the hire company.
- You may want to read this leaflet again. Please keep it until you finish work.

Any unauthorised reproduction - manually or electronically - is STRICTLY prohibited

- If your equipment develops a leak, shut down immediately and release the pressure.
- Do not connect or disconnect any tool or hose while the system is pressurised, release the pressure first.
- Do not use a greater pressure than recommended.
- Do not use the correct fitting socket or attachment; do not improvise.
- Do not connect or disconnect any tool or hose while the system is pressurised, release the pressure first.
- Compressed air must not be used to clean clothes or work areas. You must not use it in an unauthorised way and without correct equipment.
- Compressed air must not be used to blow out dust or debris from portable tools, for example, for inflating tyres.
- Do not use it to blow out debris from clothes or work areas. It can damage tools.
- Do not blast air onto skin. It can penetrate or blow splinters in.
- Do not try to put the socket onto a bolt with the wrench tumbling.
- Make sure the air hose is safely out of the way and has no kinks or twists in it.
- Check on how your equipment operates before you start it up, you must know how to stop it.
- Stop the impact wrench, and shut off the socket or attachment.
- Only use the correct fitting socket or attachment.
- Do not use worn or broken sockets – they may cause injury or damage.
- Some compressed air equipment supplies a minute amount of oil mist to prevent any tool seizing up. Check that any lubrication container on your compressor is located in the air line to prevent any tool seizing up.
- Some compressed air equipment contains oil mist to prevent any tool seizing up. Check that any lubrication container on your compressor is located in the air line to prevent any tool seizing up.

## Impact Wrench

The rules and procedures in force where people are at work may require the person responsible for this equipment to carry out a specific risk assessment

- Plan your work ahead to make sure that you will always be working safely.
- Compressed air can be hazardous. Take care not to injure yourself or others.
- This impact wrench is designed to tighten and undo different types and sizes of nuts and bolts quickly and repeatedly, using the appropriate attachments.
- The action of this wrench can cause injury or damage if the machine is not used in a careful and controlled way.
- If you have not used an impact wrench before, familiarise yourself with how the machine works before you start to use it.
- You must have at least the following items of personal protective equipment: Goggles: EN166 or BS2092; Ear muffs or plugs giving protection for levels up to 107 dB(A); Gloves.
- This machine must not be used by minors, or anyone under the influence of drugs or alcohol.
- This impact wrench is designed for operation by an able bodied adult. Anyone with either temporary or permanent disability must seek expert advice before using it.

- The following items of personal protective equipment (PPE) are the minimum required when you are working with BS2092 when you are working with noise levels up to 107dB(A) – wear hearing protection for this level as this equipment is likely to cause rotation before you start work.
- You must wear goggles (EN166 or BS2092) when you are working with particular jobs or environments which require a higher level of protection.
- Always grip the wrench with both hands while working, use the side handle if there is one.
- Always grip the wrench with both hands while working, use the side handle if there is one.
- Do not obstruct or prevent safety devices from working.
- The drive spindle on your wrench will rotate clockwise or anti-clockwise, ensure you select the correct rotation before you start work.
- If your wrench has a torque setting always set it correctly for tightening, never tighten bolts.
- If your wrench is set to 107dB(A) – wear hearing protection for this level as this equipment is likely to cause rotation before you start work.
- Keep your fingers away from the noise levels up to 107dB(A) – wear gloves to help reduce vibration from the machine affecting your hands.
- Keep your fingers away from the nut or bolt.
- Wear gloves to help reduce vibration from the machine affecting your hands.
